

Universal Masking and Social Distancing Reminders

Universal Masking

All employees, medical staff, patients and guests are required to wear a mask or cloth face covering that completely covers the nose and mouth while in the building.

This guidance includes gathering places like breakrooms and conference rooms, as well as any location where you may be in close contact with other employees and providers, patients or guests.

Social Distancing

In situations where a group may be gathered – such as in meetings, breakrooms or during meal times – please remember to maintain six feet of space between yourself and others.

PPE Reminders

Please also remember to conserve clinical PPE (medical grade masks) for patient care settings. To help ensure that we have the appropriate amount of clinical PPE, self-provided cloth face coverings are recommended for non-clinical staff, as well as for clinical staff entering and exiting the building at the beginning and end of their shifts.

Thank you for helping us ensure a safe environment of care and create places where people choose to come for healthcare, physicians want to practice and employees want to work.
